

ECS 01

CSCI-410 Spring 2013

After completing ECS Project 01 (<http://nand2tetris.org/01.php>), zip up the entire 01 folder, including all of the files that were installed there -- even with everything, the ZIP file is only ~19KB. Include the folder itself so that, when unzipped, it creates the 01 folder. Exactly how you do that will depend on the tool you use.

Name the ZIP file as follows:

COURSE_USER_TYPE_NUM.zip

where

COURSE is CS410 (not CSCI410, not CS-410, not anything else)

USER is your ADIT Username (same as you Mines e-mail user name)

TYPE is ECS

NUM is 01 (not 1, but 01)

So, for me, the ZIP file would be named:

CS410_WBahn_ECS_01.zip

While not strictly required, it will be appreciated if you follow the capitalization scheme used above.

You do not have to follow this naming convention on any of the files contained within the zip file (for this assignment, there may be assignments were you do).

GRADING RUBRIC - 40 pts

- 10 pts - Effort
 - 2 pts for each 5 gates materially attempted
 - 2 pts - Correct ZIP file name
 - 2 pts - Correct contents within ZIP file
- 30 pts - Quality & Correctness
 - 3 pts for each gate that works correctly

Grading within a category is all or nothing. Thus, if you make an honest attempt at 13 gates, you get 4pts for attempting two groups of five. Similarly, either a gate works completely correct (meaning it passes the author's test for that gate) and earns the full 3pts, or it doesn't and earns none.
