Assignment
Deitel & Deitel Exercises 22.5

HW13-1: (Deitel & Deitel Exercise 22.5)

22.5 (*Joining Tables with LINQ App Modification*) Create an app like the one in Section 22.7 that uses the Books database and displays the results of the following queries:
  a) Get a list of all the titles and the authors who wrote them. Sort the results by title.
  b) Get a list of all the titles and the authors who wrote them. Sort the results by title. For each title sort the authors alphabetically by last name, then first name.
  c) Get a list of all the authors grouped by title, sorted by title; for a given title sort the author names alphabetically by last name then first name.

Grading Rubric

Each problem is worth 10 pts (score will be recorded as a percentage of that amount)

10% Properly submitted
10% Properly named
20% Adequate comments
10% Runs
20% Produces correct output
30% Effort evidenced by the submitted work
