

CSCI-410

ECS 01

After completing ECS Project 01 (<http://nand2tetris.org/01.php>), zip up the entire 01 folder, including all of the files that were installed there; even with everything, the ZIP file is only ~19KB. Include the folder itself so that, when unzipped, it creates the 01 folder. Exactly how you do that will depend on the tool you use, but be sure to test this to make sure that this is what happens because the autograder is presently not sophisticated enough to deal with anything else and you will lose points if your submission isn't compliant.

Name the ZIP file as follows:

COURSE_USER_TYPE_NUM.zip

Where

COURSE is CS410 (not CSCI410, not CS-410, not anything else)

USER is your ADIT Username (same as your Mines e-mail user name)

TYPE is ECS

NUM is 01 (not 1, but 01)

So, for me, the ZIP file would be named:

CS410_WBahn_ECS_01.zip

While not strictly required, it will be appreciated if you follow the capitalization scheme used above.

You do not have to follow this naming convention on any of the files contained within the zip file (at least for this assignment, there may be assignments where you do). You DO need to follow the names used in the individual project.

GRADING RUBRIC - 50 pts

- 15 pts - Effort
 - 1 pt for each gates materially attempted
- 35 pts - Quality & Correctness
 - 2 pts for each gate that works correctly
 - 1 pt – Correct ZIP file name
 - 2 pts – Correct contents within ZIP file
 - 2 pts – Correct header contents
